Operational Group

Aim of the project is a sustainable agricultural sector in the Achterhoek region. Overall goals are:

- Sustainable water and soil management, to improve water quality and water availability;
- Introduction of the instrument of fertile circularity, which promotes the efficient use of minerals;
- Introduction of new techniques such as sensors for measuring water quality;
- Knowledge exchange on fertile circularity in the region and abroad.

Several working groups of livestock farmers focus on:

- Mineral efficiency;
- Water quality;
- Sustainable soil;
- Sensor techniques;
- Milk and climate change.

Lead partner: LTO Noord (Dutch Federation of Agricultural and Horticulture)

Other partners

- ▶ Waterboard Rijn en IJssel
- ▶ Vitens, drinking water company
- ▶ FrieslandCampina, dairy company
- ▶ ForFarmers, feed company
- ▶ Province of Gelderland

Farmers

- ▶ Over 250 individual farmers
